Subject Index of Volume 139

Acoustic emission signal analysis
experimental studies of sliding friction and wear via acoustic emission signal analysis, 403
Alloys
computer-aided simulation and experimental studies of chip flow and tool wear in the turning of low alloy steels by cemented carbide tools, 235
wear behaviour and wear mechanism of ceramic tools in machining hardened alloy steel, 439
Aluminium
microscopic study of cavitation erosion behaviour in copper and Cu–5.7wt.%Al single crystals, 149
tribology and corrosion of Al–1.5wt.%Zn–5wt.%Sn ion platings, 313

Boundary lubrication
boundary and hydrodynamic lubrication, 49

Calcium
tool wear and inclusion behaviour during turning of a calcium-treated quenched and tempered steel using coated cemented carbide tools, 209
Carbon
computer-aided simulation and experimental studies of chip flow and tool wear in the turning of low alloy steels by cemented carbide tools, 235
interface phenomena between oxide layers and cemented carbide tools, 225
tool wear and inclusion behaviour during turning of a calcium-treated quenched and tempered steel using coated cemented carbide tools, 209
tribological behaviour of some hydrocarbon compounds and their blends, 425
Cavitation
laser surface processing and the cavitation erosion of a 16 wt.% Cr white cast iron, 269
microscopic study of cavitation erosion behaviour in copper and Cu–5.7wt.%Al single crystals, 149
Cemented carbides
computer-aided simulation and experimental studies of chip flow and tool wear in the turning of low alloy steels by cemented carbide tools, 235
interface phenomena between oxide layers and cemented carbide tools, 225
tool wear and inclusion behaviour during turning of a calcium-treated quenched and tempered steel using coated cemented carbide tools, 209
Ceramics
wear behaviour and wear mechanism of ceramic tools in machining hardened alloy steel, 439
Chip flow
computer-aided simulation and experimental studies of chip flow and tool wear in the turning of low alloy steels by cemented carbide tools, 269
Chromium
laser surface processing and the cavitation erosion of a 16 wt.% Cr white cast iron, 269
Coatings
tool wear and inclusion behaviour during turning of a calcium-treated quenched and tempered steel using coated cemented carbide tools, 209
Composites
friction of elastomer composites: influence of surface temperature, sliding speed and pressure, 17
Computer-aided simulation
computer-aided simulation and experimental studies of chip flow and tool wear in the turning of low alloy steels by cemented carbide tools, 235

Elsevier Sequoia/Printed in Switzerland

Copper
microscopic study of cavitation erosion behaviour in copper and Cu–5.7wt.%Al single crystals, 149
Corrosion
tribology and corrosion of Al–1.5wt.%Zn–5wt.%Sn ion platings, 313
Cup drawing
effect of differential lubrication on the cup drawing of mild steel blanks, 171
Cutting power
tool wear monitoring based on cutting power measurement, 303

Diamond
study of the electrolytic grinding mechanism using a single-diamond cutting tool with a wear flat area, 285
Differential lubrication
effect of differential lubrication on the cup drawing of mild steel blanks, 171

Elastohydrodynamic contacts
vibration response of wavy surfaced disc in elastohydrodynamic rolling contact, 1
Elastohydrodynamic lubrication
two-dimensional elastohydrodynamic lubrication of elastic strips, 335
Elastomer composites
friction of elastomer composites: influence of surface temperature, sliding speed and pressure, 17
Electrolytic grinding
study of the electrolytic grinding mechanism using a single-diamond cutting tool with a wear flat area, 285
Erosion
laser surface processing and the cavitation erosion of a 16 wt.% Cr white cast iron, 269
microscopic study of cavitation erosion behaviour in copper and Cu–5.7wt.%Al single crystals, 149

Ferrite
wear anisotropy of MnZn ferrite
Part I: recorder and sphere-on-tape experiments, 93
Part II: sliding sphere experiments, 115
Part III: a wear model, 133
Friction
experimental evidence for friction and wear modelling, 77
experimental studies of sliding friction and wear via acoustic emission signal analysis, 403
friction of elastomer composites: influence of surface temperature, sliding speed and pressure, 17
motion of material in the border layer in solid state friction, 33

Grinding
correlation of process parameters in grinding, 383
study of the electrolytic grinding mechanism using a single-diamond cutting tool with a wear flat area, 285

Hydrocarbons
tribological behaviour of some hydrocarbon compounds and their blends, 425
Hydrodynamic lubrication
boundary and hydrodynamic lubrication, 49

Inclusions
tool wear and inclusion behaviour during turning of a calcium-treated quenched and tempered steel using coated cemented carbide tools, 209
Interfaces
interface phenomena between oxide layers and cemented carbide tools, 225
study by scanning electron microscopy of magnetic head–disk interface sliding, 367
Ion platings
tribology and corrosion of Al–1.5wt.%Zn–5wt.%Sn ion platings, 313
Iron
formation of a protective oxide layer in machining resulphurized free-cutting steels and cast irons, 195
laser surface processing and the cavitation erosion of a 16 wt.% Cr white cast iron, 269

Laser surface processing
laser surface processing and the cavitation erosion of a 16 wt.% Cr white cast iron, 269

Lubrication
boundary and hydrodynamic lubrication, 49
effect of differential lubrication on the cup drawing of mild steel blanks, 171

Machinability
influence of oxide nature on the machinability of 316L stainless steels, 179
Machining
plasma hot machining for new engineering materials, 251
formation of a protective oxide layer in machining resulphurized free-cutting steels and cast irons, 195
wear behaviour and wear mechanism of ceramic tools in machining hardened alloy steel, 439
Manganese
wear anisotropy of MnZn ferrite
Part I: recorder and sphere-on-tape experiments, 93
Part II: sliding sphere experiments, 115
Part III: a wear model, 133

Oxide nature
influence of oxide nature on the machinability of 316L stainless steels, 179
Oxygen
dependence of the transition from severe to mild wear on load and surface roughness when the oxide particles are supplied before sliding, 319
formation of a protective oxide layer in machining resulphurized free-cutting steels and cast irons, 195
influence of oxide nature on the machinability of 316L stainless steels, 179
interface phenomena between oxide layers and cemented carbide tools, 225

Plasma hot machining
plasma hot machining for new engineering materials, 251
Pressure
friction of elastomer composites: influence of surface temperature, sliding speed and pressure, 17

Quenching
tool wear and inclusion behaviour during turning of a calcium-treated quenched and tempered steel using coated cemented carbide tools, 209

Resulphurizing
formation of a protective oxide layer in machining resulphurized free-cutting steels and cast irons, 195

Scanning electron microscopy
study by scanning electron microscopy of magnetic head–disk interface sliding, 367
Single crystals
microscopic study of cavitation erosion behaviour in copper and Cu–5.7wt.%Al single crystals, 149
Sliding
dependence of the transition from severe to mild wear on load and surface roughness when the oxide particles are supplied before sliding, 319
experimental studies of sliding friction and wear via acoustic emission signal analysis, 403
friction of elastomer composites: influence of surface temperature, sliding speed and pressure, 17
study by scanning electron microscoy of magnetic head–disk interface sliding, 367
Steels
computer-aided simulation and experimental studies of chip flow and tool wear in the turning of low alloy steels by cemented carbide tools, 235
effect of differential lubrication on the cup drawing of mild steel blanks, 171
formation of a protective oxide layer in machining resulphurized free-cutting steels and cast irons, 195
influence of oxide nature on the machinability of 316L stainless steels, 179
tool wear and inclusion behaviour during turning of a calcium-treated quenched and tempered steel using coated cemented carbide tools, 209
wear behaviour and wear mechanism of ceramic tools in machining hardened alloy steel, 439
Surface roughness
dependence of the transition from severe to mild wear on load and sur-

face roughness when the oxide particles are supplied before sliding, 319
Surface temperature
friction of elastomer composites: influence of surface temperature, sliding speed and pressure, 17

Tempering
tool wear and inclusion behaviour during turning of a calcium-treated quenched and tempered steel using coated cemented carbide tools, 209
Tin
tribology and corrosion of Al–1.5wt.%Zn–5wt.%Sn ion platings, 313
Tribology
tribological behaviour of some hydrocarbon compounds and their blends, 425
tribology and corrosion of Al–1.5wt.%Zn–5wt.%Sn ion platings, 313
Turning
computer-aided simulation and experimental studies of chip flow and tool wear in the turning of low alloy steels by cemented carbide tools, 235
tool wear and inclusion behaviour during turning of a calcium-treated quenched and tempered steel using coated cemented carbide tools, 209

Vibration
vibration response of wavy surfaced disc in elastohydrodynamic rolling contact, 1

Wear
computer-aided simulation and experimental studies of chip flow and toolwear in the turning of low alloy steels by cemented carbide tools, 235
dependence of the transition from severe to mild wear on load and surface roughness when the oxide particles are supplied before sliding, 319
experimental evidence for friction and wear modelling, 77
experimental studies of sliding friction and wear via acoustic emission signal analysis, 403
tool wear and inclusion behaviour during turning of a calcium-treated quenched and tempered steel using coated cemented carbide tools, 209
tool wear monitoring based on cutting power measurement, 303
wear anisotropy of MnZn ferrite
Part I: recorder and sphere-on-tape experiments, 93
Part II: sliding sphere experiments, 115
Part III: a wear model, 133
wear behaviour and wear mechanism of ceramic tools in machining hardened alloy steel, 439
wear-preventing property of used gasoline engine oils, 351
Wear anisotropy
Part I: recorder and sphere-on-tape experiments, 93
Part II: sliding sphere experiments, 115
Part III: a wear model, 133
Wear prevention
wear-preventing property of used gasoline engine oils, 351

Zinc
tribology and corrosion of Al–1.5wt.%Zn–5wt.%Sn ion platings, 313
wear anisotropy of MnZn ferrite
Part I: recorder and sphere-on-tape experiments, 93
Part II: sliding sphere experiments, 115
Part III: a wear model, 133
